

Shaving Mill, 60''

MADE IN THE U.S.A.

Up To 42 Yards of Shavings Per Hour

STANDARD FEATURES

Extra Large, Heavy Duty, 60'' Wide x 9' Long Box x 30'' deep means less loading time, more production time. 1/4'' & 1/2'' steel plate walls. Steel wheels are mounted on all four corners. Open box design, can be filled while operating.

Hardened Razor Backed Cutter Knives are sharpenable and adjustable for longer life, and provide approximately 500,000 board feet of operation, in between sharpenings. (Varies depending on material)

Sensors - Fully automatic operation with sensors to prevent over travel of wood box. Radio control operation of hydraulics is available as an option.

Stationary - With 6 support legs constructed of 4'' x 4'' x 1/2'' wall steel tubing. Frame utilizes 8'' I-Beam construction, all continuous welds, fully gusseted for strength.

Deck Plate - 3/4'' thick Steel plate with re-enforced I-Beam for strength.

Cutter Shaft - Specially designed to cut both directions & remove shavings throughout the cut.

Bearings - Heavy duty, cast iron self-centering, greasable, commercial type twist lock bearing.

Pulleys - Cast type with taper lock centers, designed to disperse heat.

Shafts - All adjusting shafts have pusher screws to keep shafts aligned once they are adjusted..

Chains - All chains are #80HD Roller chain. Wood box has quad drive chains.

Shaving Thickness - Shavings are adjustable in several different ways to achieve desired final product.

Diesel or Electric Powered

200 HP Caterpillar Diesel Engine Package

Electric, 175HP on Cutter Shaft, 20HP on Hydraulics

Optional Support Equipment

Conveyors - Shavings Sizer - Remote Control - Box Divider
