

The Model 6060 for larger size skid steers features heavy duty boom design with cradle supports inside and outside the frame to secure load when carrying the load straight away or cross ways and the standard push bar features dual purpose in pushing objects as well as protecting the attachment. Serrated edges along the sides of the frame stabilize the load when hauling horizontally and the inside serrated cradle stabilizes the load perpendicular without having to re-adjust your load for balance. *Winch is Optional.*

T1 steel, Oversized Chrome Pins, and Hardened Steel Bushings for durability and dependability.

360° Continuous Rotation
