

# Truckmounted Leaf Vacuums

MADE IN THE U.S.A

Model 716 - 16 HP B & S

Adjustable lever clamps allow unit to mount to any tailgate.

## Tailgate-Mounted Vacuums Models 711 & 716

These tailgate-mounted models have lever clamp tailgate mounts that allow these units to easily attach to the tailgate of any truck without tools or vehicle modifications. The latch and lock mechanisms are on the outer side of the unit, so that the vacuum can be easily removed, even from

a fully loaded truck. The swivel discharge chute can be reversed to vacuum/unload debris from the truck, without removing the unit from your tailgate. 10' long heavy duty vacuum hose, handle, and hanger bracket assembly are standard and easily removed for transport.

### 711/716 Options

- 11 HP or 16 HP Briggs & Stratton
- 45° exhaust connector
- From 14" to 38" height extension
- Snow plow mounting brackets
- Square to round reducer to mount exhaust hose to collection box

## Maximum Vacuuming Power!

## Bumper-Mounted Vacuums Models 711LS & 716LS

The Salsco Bumper Mount units attach directly to the Reese hitch of your tow vehicle, not to the tailgate. The exhaust flap is easily adjusted allowing you to control where you blow and height extensions up to 38" are available. As with the tailgate-mount, many options are available to fit your needs. The perfect companion for this unit is the

Salsco Swing Away Bumper Mount. The Bumper Mount attaches to the Reese hitch of the tow vehicle, and the Vacuum attaches to the Bumper Mount. This allows the vacuum to swing out of the way, on the bumper mount, while the vehicle is being emptied. Then you simply swing the unit back in place and you are off vacuuming again.

### Features of the Truckmounted Leaf Vacuums

- Powder coat paint
- Easy adjust exhaust flaps
- 1 year warranty
- Heavy duty frame assembly
- Heavy duty intake hose with handle
- Hose hanger bracket assembly
