Sal's Corner

February 2023

The winter show season has burst into full swing. Salsco is blessed to have excellent products that the markets need and seem to be willing to wait for.

We continue to look for ways to improve our delivery dates, in spite of labor and supply shortages. Even though we have a good backlog, we must continue to plan for the future. Reach out for next year's orders.

Thank you, *Sal*

Why drag brush to the chipper? The self-propelled **Track Chipper** can go almost anywhere. It will fit through most backyard gates and go through the thickest woods. The 200 lb. 1" thick, fully balanced impeller has four (4) exhaust paddles and extra wide knife pockets to provide air flow for chip exhaust. The impeller is vented to provide even more air flow. The Track Chipper comes with its own over-the-road trailer.

To watch a recent video of Eric Hungate, Midwest Region Sales Manager, discussing the features and benefits of this labor-saving chipper, click photo below.

I Think I Can....The track system provides stability and traction as the rubber tracks drive the Chipper up or down most any hill and will not damage lawns, driveways, and sidewalks.

Track Chipper Transport Trailer is equipped with a Torflex axle, heavy-duty diamond plate fenders with light enclosures, and a D.O.T. approved LED light package. Click photo above for more about the Transport Trailer.
