

ELECTRIC ROLLER Model 09074, EGR, QC

Salsco, INC.
LEADER BY DESIGN

**MADE IN
THE U.S.A.**

Both rolls are driven from individual drive motors for maximum traction. As with the Gas Roller, this unit has two, 10-3/4" oscillating rolls, and articulating steering. Greens speed can be increased up to 1-1/2' or more, without compaction, without changing undulations, and without burn marks from slipping. The Salsco Electric Roller has up to a 40° climbing traction, without slippage or loss of control and can be easily unloaded or loaded from anywhere around the green, thereby direction of rolling can be changed as desired.

No Oil! No Heat! No Noise! No Vibration! No Pollution!
