Maximum Vacuuming Power

Tailgate-Mounted, Model 716

Model 716 Tailgate-Mount

Model 716 has a lever clamp Tailgate Mount that allows the unit to easily attach to the tailgate of any truck without tools or vehicle modifications. The latch and lock mechanism is on the outer side of the unit, so that the vacuum can be easily removed, even from a fully loaded truck. The **swivel discharge chute** can be reversed to vacuum/unload debris from the truck, without removing the unit from your tailgate. 10' long heavy duty vacuum hose, handle, and hanger bracket assembly are standard and easily removed for transport. The 716 Tailgate Vacuum can also be mounted to the Salsco Swing Mount as pictured below.

716 & 716LS Options

- 45° exhaust connector
- 14" - 38" height extensions
- Square to round exhaust reducer
- Swing Away Bumper Mount

Bumper-Mounted, Model 716LS

The Salsco Bumper Mount Vacuum attaches directly to the Reese hitch of your tow vehicle, not to the tailgate. The exhaust flap is easily adjusted allowing you to control where you discharge and height extensions up to 38" are available. As with the Tailgate Mount, many options are available to fit your needs. The perfect companion for this unit is the **Salsco Swing Away Bumper Mount**. The Bumper Mount attaches to the Reese hitch of the tow vehicle, and the Vacuum attaches to the Bumper Mount. This allows the vacuum to swing out of the way, on the Bumper Mount, while the vehicle is being emptied. Then you simply swing the unit back in place and you are off vacuuming again.

Standard Features

- Easy adjust exhaust flap
- Heavy duty intake hose with handle
- Heavy duty frame assembly
- Hose hanger bracket assembly
