“Performance Based Training is Not Enough!”

The Salsco Safety Shield is the Latest Advancement in Wood Chipper Safety!

The Salsco Safety Shield (SSS) creates a magnetic field in the hopper which, when it is disrupted by the magnet in the wrist or ankle band, will stop the feed rolls. This is a safety feature designed to help prevent accidents.

The SSS can be installed on most handfed wood chippers equipped with hydraulic infeed systems, new or old.

Designed to perform in the most extreme conditions and environments, the Salsco Safety Shield is the ideal solution to enhance safety operations.

Effectively Prevent Chipper Injury!

As the magnets enter a hazard zone defined by the SSS, an instant signal is sent to the chipper’s feeding mechanism, shutting it down before the worker can come in contact with the infeed rollers.

Reset Stations are located on the two outer sides of the infeed hopper. By simply hovering a hook and loop band next to a reset station the feed rolls reactivate immediately.

The SSS is a safety system that vastly improves wood chipping safety, proactively and effectively preventing wood chipper injury by shutting down the chipper’s infeed system when an operator enters a defined hazard zone.

Quality of Workmanship, Innovative Design, Built to Last!
Salsco Hydraulic Feed Chippers - 10” Capacity - 18” Capacity

Model 810M

Model 810PTO

Model 810

Model 813XT

Model 818

Model 818XT

MANUFACTURER OF OUTDOOR POWER EQUIPMENT
Products for Turf & Lawncare, Rental, Construction, Tree Care, Wood Processing, Nursery & Farm Industries
3-1/2” - 18” Capacity, Gas, Diesel, & P.T.O. Wood/Brush Chippers
Gas & Electric Rollers - Tranz-Former - CRV Core Recovery Vehicle
Mini-Paver - Mini-Track Paver - Cobra Curber - Scorpion Router - Concrete Paver
Chipper Shredder Vacuums - Tailgate & Truckloader Vacuums
9 cu. yds. - 50 cu. yds. Per Hour, Electric, P.T.O. & Diesel Powered Shaving Mills
