# CAN I MAKE MONEY WITH A 12" SHAVING MILL?

1 cubic yard of shavings weighs 135 lbs.  
1 ton = 2,000 lbs. ÷ 135 = 14.8 cubic yards per ton

If you sell shavings for \$10 per cubic yard you will gross \$148 per ton of wood.

Our 12" mill produces 8 cubic yards of shavings per hour, so you can expect to use approximately 1,000 lbs. of wood per hour. If you run the mill 8 hours/day, you will make 64 yards of shavings. You would have used 5.4 tons of wood during the day.

If your cost for wood is \$30 per ton, your cost of wood would be \$162.00 per day.

The following example is based on running the shaving mill for a one-day period. The costs are based on the following assumptions, and are approximate.

Finance Charges =	\$562/month
Labor Cost =	\$12/hour (1 person)
Fuel =	\$4/gallon
Cost of Wood per ton=	\$30
Maintenance =	One man hour \$12
