

STRAWBLOWER

Models 525 & 525T

3.3 Bales of Straw - Per Minute

Model 525 - Skid Mount

Model 525T - Trailer Mount

The swivel turret on both the 525 & the 525T, will make road side work and large areas easy to do. With simple **360° rotation**, and full travel from negative 45° to positive 45° there isn't much area you can't reach! Heavy duty tubular steel frame is fully gusseted where necessary for strength. Adjustable height hitch and Torflex axle for smooth over the road travel, are standard equipment. Unlike other units with couplers that don't work, **Salsco uses two triple "B" section belts and a trouble free jack shaft arrangement.** This cushions and separates the engine from the reverse shock load of the work being done.

25 HP Kohler, electric start engine for reliability. Large 6.6 gallon, portable polyethylene gas tank, with fuel gauge.

Add or remove chain to change the texture of the straw.
